Since the publication of his international bestseller What Got You Here Won't Get You There, business guru Marshall Goldsmith has spoken to hundreds of thousands of people around the world, sharing the ideas he put forth in that groundbreaking book. But a few years ago, he realized that while some of the habits he outlined in What Got You Here apply to both men and women, women face specific, and different, challenges as they seek to advance in their careers.

So he partnered with his longtime colleague, women's leadership expert Sally Helgesen, to create this invaluable handbook for women trying to take the next step in their careers. They realized that for women in particular, the very skills and habits that made them successful early in their careers could actually be holding them back as they advance to the next stage of their working lives.
